19. (Allowed) A hockey practice system, comprising:

a panel including a plurality of openings each comprised of a square shape, wherein said plurality of openings are comprised of at least two vertical rows and/or at least two horizontal rows;

a first support and a second support pivotally attached to side portions of said panel for providing support to said panel in a vertical manner;

a plurality of targets each comprised of a square shape positionable within said plurality of openings, wherein said plurality of targets are comprised of a

resilient material and wherein said plurality of targets are larger than said plurality of openings;

a handle attached to an upper portion of said panel; and

an indicia positioned upon each of said plurality of targets, wherein each of said plurality of targets has a different indicia.

20. (Allowed) The hockey practice system of Claim 19, wherein said panel includes a corresponding number of indicia adjacent each of said plurality of openings that indicate where each of said targets are to be positioned.

**Please add the following claims:**

21. (New) A hockey practice system, comprising:

a panel including a plurality of openings each comprised of a square shape, wherein said plurality of openings are comprised of at least two vertical rows and/or at least two horizontal rows;

a first support and a second support pivotally attached to side portions of said panel for providing support to said panel in a vertical manner; and

a plurality of targets each comprised of a square shape positionable within said plurality of openings, wherein said plurality of targets are comprised of a resilient material and wherein said plurality of targets are larger than said plurality of openings.

22. (New) A method of practicing hockey shooting utilizing a hockey practice device, said hockey practice device comprising a panel including a plurality of openings, and a plurality of targets positionable within said plurality of openings, said method comprising the steps of:

positioning said targets within said openings of said panel;

positioning said panel in a substantially vertical state;

providing at least one hockey puck; and

shooting said at least one hockey puck towards at least one of said plurality of targets for the purpose of hitting and dislodging at least one of said plurality of targets with said hockey puck.
